

Making a Butterfly

For this lesson, your student will be making a butterfly using a few simple supplies.

Your student will need:

- A coffee filter
- Markers
- A spray bottle
- Glue
- A pipe cleaner
- Two googly eyes
- A clothespin

Instructions

First, your student should color their coffee filter using the markers.

Next, your student should spray the coffee filter with water to blend the colors together. Once the filter is dry, they should scrunch it in the middle to make two wings.

Next, your student should color their clothespin with many different colors and glue the two googly eyes onto it. They should also fold the pipe cleaner into a “V” shape and use the clothespin to clip it at the top to make antennas.

The last step is for your student to take the completed clothespin and clip it onto the coffee filter wings.
