

Making a Butterfly

For this lesson, we are going to use a few supplies to create a beautiful butterfly. First, you should color your coffee filter using your markers. Don't be afraid to try many different colors.

Next, you should spray the coffee filter with water to blend the colors together. Once the filter is dry, you should scrunch it in the middle to make two wings like so:

Next, you should color your clothespin with many different colors and glue your two googly eyes onto it. You should also fold your pipe cleaner into a “V” shape and use the clothespin to clip it at the top.

The last step is to take your completed clothespin and clip it onto your coffee filter wings. You should now have a beautiful butterfly ready to fly.
